

Microwave Oven Cooked Corn on the Cob

TIP: This is the fastest way to cook 1-4 ears of corn. If you're cooking more than that, I'd recommend using the pot cooked method as using the microwave oven at 2 minutes per ear of corn won't really save you much time.

Preparation Time: 1-2 minutes

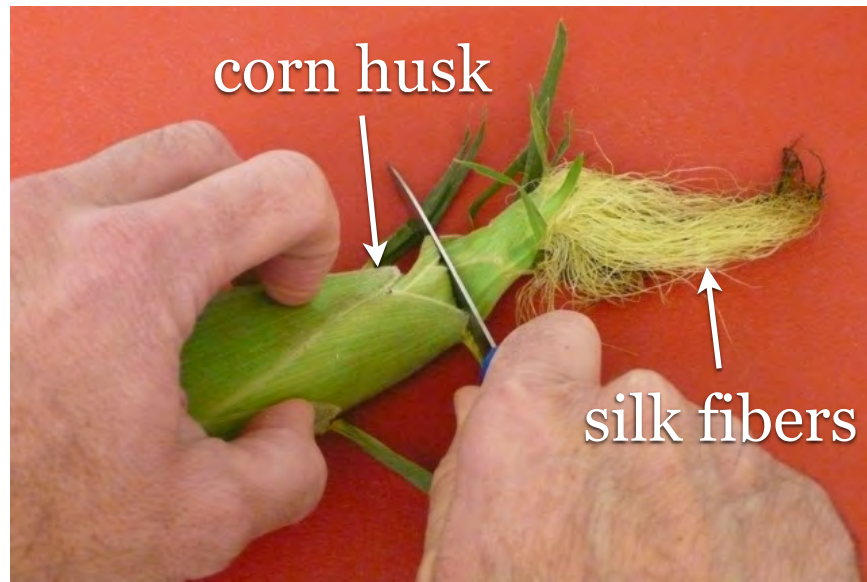

Cooking Time: 2 minutes per ear of corn

Needed
(for 1)

- 1 Ear of Corn
- Microwave Oven Safe Plate (big enough to hold corn)
- Sharp Knife
- Cutting Board
- Microwave Oven

1. Use a sharp knife to cut off the top of the **corn husk** and **exposed silk fibers**.

2. Wet the **corn** with cool tap water.

3. Put the **corn** on a microwave oven safe plate, place the plate in the middle of the microwave oven, and...

...cook using HIGH heat for 2 minutes per **ear of corn** (4 minutes for **2 ears of corn**, 6 minutes for **3 ears of corn**). **NOTE:** *Cooking time may differ slightly depending on the watt power of your microwave oven.* The microwave oven shown here uses 1200 watts and cooks the **corn** in 2 minutes per **ear of corn**.

4. After cooking, CAREFULLY remove the plate from the microwave oven,...

...let the **corn** rest on the plate until it is SAFELY COOL to touch,...

...then peel off the **husk** and **silk fibers** and...

...serve warm.
